Concept Note

Jammu and Kashmir Economic Associations in collaboration with Lingaya's Vidyapeeth is glad to announce First 10 days international online research Methodology workshop in Social Sciences. The purpose of this research methodology course is three-fold. First, we try to discuss the relationship between the universe of economic theory with that of economic data and econometrics. Second, we discuss research methodology tools for specific areas of econometrics and management sciences. Third, we discuss applications of econometric tools and analysis of results to some specific areas of Economics and business management like Health, Education Public Finance, Agriculture, Environment etc. The emphasis is on the practical mode of teachings which will help the participants to learn the technicalities for handling software for data analysis in a systematic manner. Thus, the schedule is aiming to have a topic wise brief discussion on theory followed by thorough practical sessions. ThI workshop is proposed to give a thorough exposure to the Cross Sectional and Panel data analysis and the related econometric tools. The participants will get a good training on software's likes STATA, R, EViews, SPSS. Smart PLS Gretl software, Jamovi Software and Python and will learn how to conduct data analysis using them. By the end of the programme, they will be able to develop their conceptual clarity and practical knowledge to run the software for analysis and interpreting the data for their research.

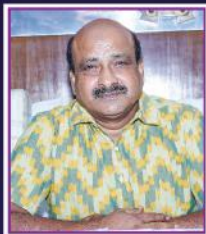

Objectives

Understanding of basic research methods and their uses in social science research. Thus, the primary objective is to impart training on how to carry out simple but valid data analysis on economic data i.e., how to choose the right method and how to make the right conclusion. 10-day international research methodology workshop we are organizing for researchers. The workshop aims to enhance their skills and knowledge in conducting quality research in social sciences, management, and economics. Etc. Following are the topic to be covered during the 10 day workshop.

Topics to Cover

- How to write a Research Paper in Social Science and Policy-based Subjects and How to publish research papers in high index journals
- Writing Research Proposal/Synopsis
- Hands on Primary Survey data collection and Questionnaire Preparation
- Qualitative Research Methods
- Understanding Sampling Techniques in Research
- Hypotheses Testing: Parametric and non-parametric tests (Jamovi Software for data analysis)
- Basics of STATA Software Practical session
- Linear Probability Model (LPM), Logit, Probit, and Tobit models, and Confirmatory Factor Analysis (CFA) STATA Software
- Fundamentals of Econometric Modelling: Applications using Gretl software
- Hands-on Stata workshop using MICS UNICEF data. Data Cleaning, Data Management, Visualisation and Analysis
- The Role of AI in Research Productivity
- Club convergence test on STATA
- Mastering Panel Data Regression with EViews Software: A Hands-On Workshop
- Time series analysis using EViews Software - ARDL estimation
- Computing Efficiency and Total Factor Productivity using DPIN
- Measuring the impact of Hiring and Firing laws on total factor productivity: A quantitative Analysis using judicial outcomes.
- Hands-on bibliometric analysis and dimensions for extracting papers (VOS viewer Software)

- Input-Output Models and Linkage Analysis: An illustrative example
- Handshake with Smart PLS
- Moderation Analysis in Smart PLS
- Data Wrangling with R and basics of Quarto in R and Python.
- Hands-on R Basic Statistical tests and OLS
